← Review queue

City Admin

26 kg needs an explanation.

Batch B-1029 · Kamuning Market → QC Composter 01 Collection: 29 Oct 2026 · Intake: 30 Oct, 7:20 AM

Weighed diversion	Verified intake	Difference
368 kg	**342 kg**	**26 kg**

Intake mismatch · Not yet resolved

Do not mark the missing 26 kg as verified. The original diversion record and vendor earnings are retained.

Evidence to compare

Station handoff log	**368 kg · 11 loads**
Composter intake slip	**342 kg · IN-1030-07**
Scale photos	**11 attached**
Received by	**R. Dela Cruz**

Receiver note: “One sack was held for a contamination check.” No second intake receipt has been recorded.

Review note

Ask station lead to confirm the held sack weight and provide a second intake slip.

Request recount

Keep under review

A recount request keeps this exception open. Any later correction needs a reason, reviewer and timestamp; original values stay in the audit trail.

Illustrative data

A civic utility, with the clarity of a wallet.

Every kilo counted, paid for, and proven.

Static design specimens · Ready for manual component conversion
These are editable specimen frames, not native local components or styles. No interactions, links or animations are attached.

01 Color & accessible application

Cream	Leaf	Forest	Charcoal	Gold	Tangerine	Citrus
#F6F4EE	#65A33D	#1A4D2E	#142823	#F9A01B	#EA7C0A	#C25400

AA text pairs

Charcoal / Cream 14.06:1 Forest / Cream 8.90:1 Muted #52645A / Cream 5.74:1 Charcoal / Leaf 5.05:1

Use saturation with intention

Only grade and sync chips use saturated leaf or gold. Forest drives primary actions. Citrus uses a pale tint with charcoal labels; no small cream text on citrus, leaf or orange.

No pure black or white

Cards: #FCFAF5 · Borders: #D6DED0 Soft forest tint: #E8EEDC Warning tint: #FFF0D3 Error tint: #FBEADA

02 Type, numerical clarity & resilience

Typography / Headings

Every kilo matters.

Ready for the first kilo

Poppins Semibold · 28 / 34 mobile title. 20 / 24 section. 40 / 48 board display.

Typography / Body & numbers

Food waste into fair earnings.

₱184.20

12.50 kg · 312 kg · ₱0.00

Inter Regular 14 / 20 · labels 12 / 17. Monetary and kilo fields use tabular numerals; retain two decimals for pesos.

Accessibility / 130% text

Saved on this device. We'll sync when the signal returns.

Weigh a Load

Body 14 → 18.2; button 16 → 20.8. Hug height, wrap copy and grow cards. Screens scroll; never shrink type to fit.

03 8pt rhythm, shape & elevation

Spacing scale

8 16 24 32 48

24px page inset · 16px card inset · 8px inline gap.

Shape & touch targets

16px cards · 12px controls · pill status chips.

56px primary actions; 48dp minimum for every tappable item. Icons always pair with a label; target includes the full row.

Quiet depth

Shadow: 0, 4, 16 · #142823 at 4%.

Use a 1px neutral boundary. No floating layers compete with the weight or wallet balance.

04 Controls & explicit states

Button / Primary states

Weigh a Load

Saving on device...

Payout at ₱200

Default, loading and disabled. Loading keeps the action label explicit; safe retry preserves the record ID.

Grade / Three choices

Clean	Minor	Rejected
₱2.00/kg	₱1.00/kg	₱0.00/kg

Clean selected · Minor · Rejected

1 Scan · **2 Weigh** · 3 Photo · 4 Confirm

Exactly three decisions. Selection uses a check and boundary, never color alone. Rejected earns ₱0.00; no payment.

Sync / Status chips

Synced

Offline · 3 queued

Syncing 1 of 3...

Record retained

Upload status is distinct from intake verification. Only status and grade receive saturated emphasis.

05 Inputs, records & reusable surfaces

Input / Phone & OTP

Mobile number

+63 917 234 5678

4 8 2 6 1 9

Code sent

Persistent labels, country code, explicit code status. OTP groups six digits; 48dp minimum targets.

Load / Record card

Maria Santos
10:42 AM · WL-261030-0042
12.50 kg / ₱25.00 — Clean

Minor food scraps
29 Oct · WL-261029-0036
8 kg / ₱8.00 — Minor

A stable unique ID anchors the receipt, queue and retries. Separate weight, earnings and status from vendor identity.

KPI / Administrative summary

Tons Diverted

2.184 t

2,184 kg weighed · 7 days

Show unit and accounting basis. Weighed diversion never silently becomes verified intake.

Banner / Offline local save

Saved on this device
3 loads queued · Last sync 10:18 AM. Closing the app won't remove the record.

Offline is a service promise. State what is saved, what remains to sync, and when it last succeeded.

Banner / Recoverable sync error

Record retained. Retry safely.
We reuse WL-261030-0042. The server matches an existing record instead of duplicating it.

Explain retention before asking for a retry. Never ask staff to recreate the same load.

Demo policy: 100 kg per vendor per week · Clean ₱2.00/kg · Minor ₱1.00/kg · Rejected ₱0.00 · Payout minimum ₱200. These are example city policies, not Philippine law.

MANUAL PROTOTYPING HANDOFF / STATIC SCREENS

Small decisions. Clear consequences.

Numbered phone labels establish the sequence. These notes sit outside the phone frames; no prototype interactions are attached.

Entry & access

01 Welcome → 02 Install → 03 Role → 04 Phone → 05 OTP.

Install is optional for access; installed state changes the primary label to “Open app”. Station Staff proceeds to 06; Vendor proceeds to 12; City Admin proceeds to 17.

Weigh flow · one record, four steps

06 Station → 07 Scan → 08 Weigh → 09 Photo → 10 Confirm → 11 Receipt.

Check QR identity before weight. Tare the container; keep one grade selected. Retake stays on 09. Review on 10 is not yet submitted. Submit shows “Saving on device…” then “Syncing…”; 11 is shown after server acknowledgement.

No network at submit → 15 Saved offline. A failed upload → 16 Record retained. Safe retry leads to 11 after acknowledgement, or keeps 16 with the record still saved. Empty day uses 14.

Vendor flow · familiar wallet logic

12 Balance → 13 History, record detail & payout status.

₱159.20 prior balance + ₱25.00 latest load = ₱184.20. ₱15.80 remains to the example ₱200 threshold. No payout has been requested. EN / FIL stays visible; Tagalog microcopy explains earnings and payout status.

Why it is arranged this way

Hick’s law

08 · Only Clean / Minor / Rejected compete. Each step has one primary next action. Navigation and the four-step sequence are not competing decisions.

Fitts’s law

06, 08, 10 · Full-width, icon-and-label actions sit in the thumb zone. Minimum touch targets are 48dp; main buttons are 56px.

Jakob’s law

12–13 · A familiar wallet balance, threshold progress and chronological transactions reduce learning effort.

Von Restorff effect

Grade and sync chips alone use saturated leaf or gold. Quiet forest actions keep the weight and peso hierarchy distinct.

Visibility of system status

05, 09, 11, 15–16 · Sending, verifying, captured, saving, syncing and retained states name what the system is doing.

Error prevention

08, 10, 16 · Visible vendor cap, explicit confirmation and a stable record ID prevent over-cap loads and duplicate retries.

Data & policy guardrails

Maria Santos / V-0148 / WL-261030-0042 is the same example record throughout. The online receipt and offline queue are alternative outcomes, not two loads.

100 kg per vendor per week, Monday–Sunday: 52 kg before this load; 64.50 kg after. This is an example city policy, not a legal limit. If a load would exceed it, stop before submission and ask the city administrator to review.

Station 06 is a 30 Oct snapshot after online submission. Admin 17 is a later 31 Oct reconciliation snapshot: 2,184 kg weighed, 2,136 kg verified intake, 48 kg unresolved. “Synced” does not mean “intake verified”. Savings are modeled, not audited.

For later implementation: tabular numeric font features, secure durable storage, idempotent submission, queued photo upload and report generation require engineering. This deliverable shows their UI states only.
